Taking User Input

Scanln function is used to take the input from the user in Go language.

Scanln function is available in "fmt" package.

Example:-

```go
package main

import "fmt"

func main() {
    fmt.Println("Enter Your First Name")
    var first string
    fmt.Scanln(&first)

    fmt.Println("Enter Last Name")
    var second string
    fmt.Scanln(&second)

    fmt.Print("Your Full Name is : ")
    fmt.Print(first + " " + second)
}
```

Output:-

```
Enter Your First Name
Gautam
Enter Last Name
Jha
Your Full Name is : Gautam Jha
```
